

# HELP US FIGHT WHOOPING COUGH!

You may be eligible to participate,  
if you are:

- ✓ aged between  
18 – 55 years
- ✓ in good health
- ✓ not taking  
antibiotics

We are looking for healthy participants to take part in a new study.

PERISCOPE is a new study investigating a novel method to protect people against the disease Whooping cough.

The study involves attending 9 visits at the NIHR Southampton Clinical Research Facility and a course of antibiotics.

Participants will be compensated up to **£785** for their time, travel and inconvenience.
